I use PIL to save a series of images into the same directory. Since one of them is a log file that should contain the timestamp in its file name, I would like to save images with date-time names like image\_20120814183511.jpg, image\_20120814183512.jpg and so on. I thought there was a simple way to do this, but couldn't find anything useful yet. Any hint? A: Yes, PIL provides a date\_string\_format() function. The date\_ e79caf774b
